Experience

Persistent Systems Ltd.

January 2022 – Present

Lead Software Engineer

Kolkata, West Bengal

- **Project: Personal Loan Offer Management & SingleLOS** | **Technologies: Salesforce, Experience Cloud, Heroku** | Designed a **unified loan origination platform (SingleLOS)** tailored to diverse personas, resulting in a **50% reduction in Turnaround Time (TAT)** and a **15% improvement in conversion rates**. Built the **PL journey for Offer Management on Heroku** and implemented robust **eKYC and Data Quality Check functionalities** within Salesforce. Led a **Digital KYC revamp** for OKYC and DigiLocker flows, utilizing funnel analytics to reduce failure rates by **90%** and significantly enhance user experience.
- **Project: Financial Services LOS** | **Technologies: Salesforce FSC, Heroku, Mulesoft, AWS, OCI** | Contributed to the **development and Heroku deployment of a Loan Origination System (LoS) app** supporting over **50,000 daily loan applications**. Secured **Node.js integration with Salesforce**, reducing **data synchronization errors by 15%**. Implemented **JWT token-based authentication**, improving **user onboarding efficiency by 20%**. Engineered the **DMS Parental Pull Document and DCI Component** for efficient management of applicant KYC documents. Configured **Salesforce SSO with IDAM** for automated user management, **reducing manual setup time by 90%**. **Built and configured a Nginx reverse proxy server on Heroku** to manage load balancing and seamless backend-frontend communication.
- **Project: Manufacturing Route Management** | **Technologies: Salesforce Maps, Experience Cloud, Commerce Cloud** | Developed external websites using **Salesforce Maps and Experience Site Builder**, leading to a **10% increase in optimized sales routes**. Implemented an **approval process for visit plans**, **reducing approval time by an average of 24 hours per plan**. Developed an **expense tracker** for real-time visibility and a **projected 5% reduction in unapproved expenditures**.
- **Project: Technology Sector Analytics** | **Technologies: TableauCRM, Sales Cloud, AWS S3** | Played a **key role in building an analytics dashboard** for revenue forecasting, contributing to a **3% uplift in quarterly revenue projections**. Actively contributed to the **Partner Engagement Matrix (PEM)**, improving **data accuracy for sales performance by 95%**. Executed **Salesforce admin configurations**, reducing **manual configuration effort by 25%**.
- **Project: Banking Sector LoS** | **Technologies: TableauCRM, Einstein Analytics, Sales Cloud** | Contributed to understanding the **high-level design of the Loan Origination System (LoS)**, defining a system capable of processing **over 10,000 loan applications daily**.

GeeksForGeeks

November 2020 – December 2021

Technical Content Writer (Intern)

Remote

- Wrote articles related to **Data Structures and Algorithms** and implemented those algorithms using **C/C++, Java, and Python**.

Technical Skills

Languages: Java, JavaScript, TypeScript, PostgreSQL, Salesforce Triggers, Salesforce Apex, Salesforce Object Query Language(SOQL), Salesforce Object Search Language(SOSL), Salesforce Analytics Query Language (SAQL).
